Project Title: Modern Family Website

This website will include multiple pages with a navigation bar at the top, allowing users to explore different aspects of Modern Family. The site will focus on an overview of the show, the show's characters, and what it's known for (cultural impact, awards, etc.)

Home Page / Introduction

Introduce Modern Family as a popular American sitcom that aired from 2009 to 2020. Provide a brief overview of the premise: three very different and non-traditional, interconnected families navigating everyday life. It should include:

- A large image of the full cast
- A short summary of the show's general premise
- How many seasons
- Genre

Characters Page

Organize the characters by the three main families. Each section will include headshots, names, roles within the family, and actor names.

- Pritchett Family (Jay and Gloria Family)
- Dunphy Family (Claire and Phil Family)
- Tucker-Pritchett Family (Mitchell and Cam Family)

Cultural Impact, Legacy, Recognition, Awards Page

Describe the show's influence and recognition over time:

- Popularity and long-running success (11 seasons)
- Awards and recognition (e.g., Emmy Awards, especially for Outstanding Comedy Series)
- Cultural significance (showing diverse families?)
- Personal experience with the show?
